

# Sleeved Posts w/ Cable Overview

## Framework For Aluminum Sleeved Wood Posts

### Guidelines for proper installation of the ADI™ cable railing system by Ultra-tec:

- Use 4" aluminum sleeve with a 4x4 wood post for structural support.
- Top rail is required to support posts. (Bottom rail is optional)
- Cables are to be spaced at 3-1/8" on center.
- Cable must be supported every 48" to keep the cable from deflecting over 4" to pass code.
- Cables are to be tensioned to 225 lbs of tension minimum.
- 36" Rail height typically uses 10 runs of cable, 42" rail height typically uses 12 runs of cable.
- Lag style cable fittings are required for cable used with sleeved posts.
- Cable kits must terminate at corner posts, or posts where the cable is at an angle.

#### For level runs using wood posts with aluminum sleeves.

**(Outside diameter 4" or less)**

300 Series (inside to inside)

Adjust-a-Body® with Hanger Bolt to Push-Lock® Lag.

#### For stairs using wood posts with aluminum sleeves:

**(Outside diameter 4" or less)**

500W Series (inside to inside)

Adjust-a-Body® with Threaded Eye and Standard Lag Eye to Push-Lock® with Threaded Eye and Standard Lag Eye.

\* If using sleeves over 4" in diameter - Use cable kits for composite sleeves. Reference pages 127 - 128
