

Sleeved Posts w/ Cable Overview

Framework For Aluminum Sleeved Wood Posts

Guidelines for proper installation of the ADI™ cable railing system by Ultra-tec:

- Use 4" aluminum sleeve with a 4x4 wood post for structural support.
- Top rail is required to support posts. (Bottom rail is optional)
- Cables are to be spaced at 3-1/8" on center.
- Cable must be supported every 48" to keep the cable from deflecting over 4" to pass code.
- Cables are to be tensioned to 225 lbs of tension minimum.
- 36" Rail height typically uses 10 runs of cable, 42" rail height typically uses 12 runs of cable.
- Lag style cable fittings are required for cable used with sleeved posts.
- Cable kits must terminate at corner posts, or posts where the cable is at an angle.

For level runs using wood posts with aluminum sleeves.

(Outside diameter 4" or less)

300 Series (inside to inside)

Adjust-a-Body® with Hanger Bolt to Push-Lock® Lag.

For stairs using wood posts with aluminum sleeves:

(Outside diameter 4" or less)

500W Series (inside to inside)

Adjust-a-Body® with Threaded Eye and Standard Lag Eye to Push-Lock® with Threaded Eye and Standard Lag Eye.

* If using sleeves over 4" in diameter - Use cable kits for composite sleeves. Reference pages 127 - 128
